

## Environmental Management Objectives

### Defining objectives for environmental management and planning for their achievement

Archiva S.r.l. a socio unico defines environmental management objectives and plans for their achievement: this enables the achievement of strategic objectives, the implementation of environmental management policies, and the measurement of IMS (Integrated Management System) performance indicators. The results of the environmental risk assessment and risk treatment phase are used as input for the revision of the objectives to ensure that they remain appropriate to the organisation's circumstances.

The objectives below are:

- consistent with the environmental management policy;
- measurable, when it is possible to determine - according to a certain criterion - when the target is achieved;
- linked to the relevant environmental aspects identified in the environmental management policy;
- monitored, communicated and - when necessary - updated.

The provision of the internal application services of Archiva S.r.l. a socio unico, as well as those intended for its customers, are inspired by the best practices of environmental management for the ICT (Information and Communication Technology) sector.

Archiva S.r.l. a socio unico through the ISO 14001 certification, establishes the following objectives:

1. improvement of environmental management, through investments in the structure, means, IT equipment and training of internal staff;
2. evaluation of various alternatives for the renewal of the company car fleet in line with the policy for environmental management;
3. supply of electricity for the provision of business services and for the operating headquarters of Archiva S.r.l. a socio unico, exclusively from renewable sources;
4. alignment with the objectives of Agenda 2030 for Sustainable Development.
